**“Mix Signature Types and Signing Devices on the same document”**

**“All signed documents stored locally, with signor data embedded inside the document.”**

**“Signed documents can be viewed with signatures and printed from any PDF viewer.”**

**“Neutral Add On eSignature enabling and workflow Application for banking, re where forms are signed, and signatures require extracting**

- Flexible licensing models pay up front/subscription.
- External Hosted SAAS/On Premise.
- Out of the box with customisation and integration available if required.
- Create your own workflows for each document uploaded ad hoc.
- Reporting with audit trails.

**“Reduce paper scanning and signature scanning”**

This product is ideal when customer interfacing, and filling out forms that require signatures, either at the counter or eMobile.

There is an encoded stenographic signature capability where signatures need to be extracted for visual verification, drivers licenses, ID cards etc.

**“One Natural Legal Digital Process”**

- Create
- eSignature Enable
- Deliver for Signing
- Save and Distribute

**“Security, Digital and Biometric Evidence Captured at time of Signing in one Transparent Process”**

- Validate
- Bind
- Verify
- Non Repudiate
- Digital Evidence

**“Affordable 3 Year customised contract option with fixed price, including support**

**“Features”**

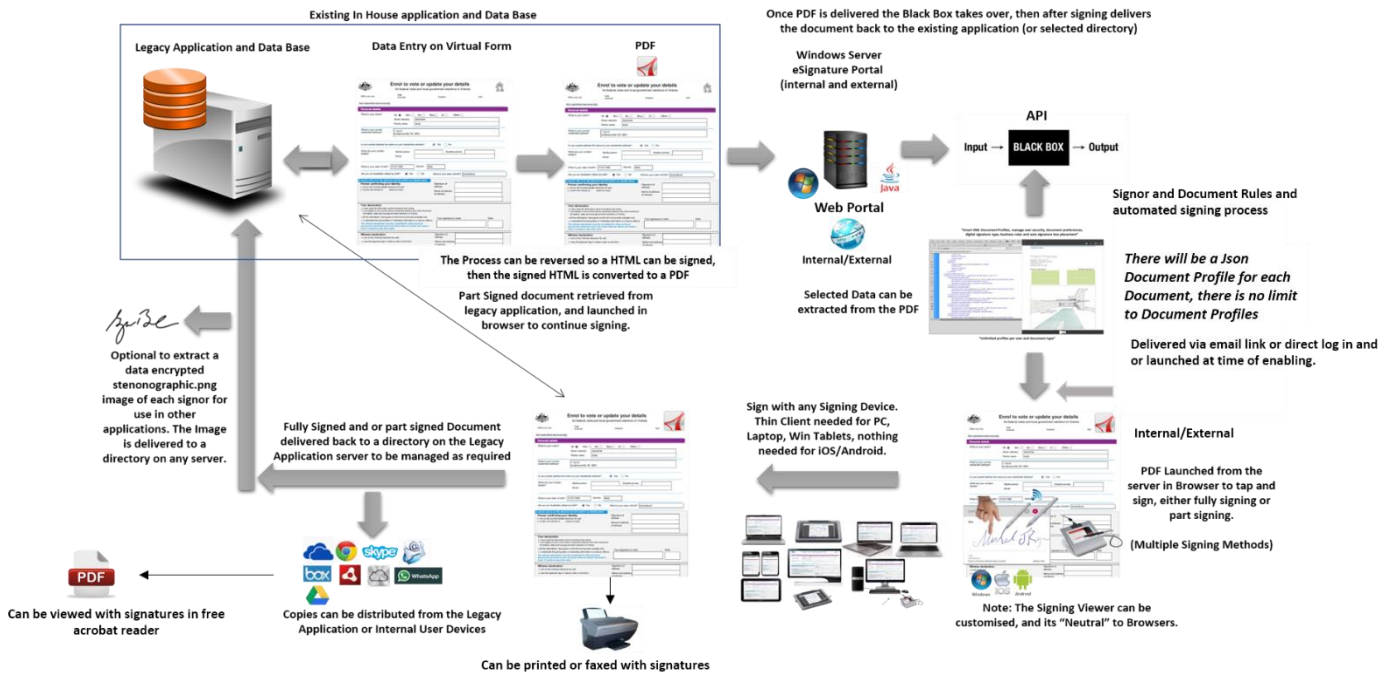

- ✓ Add on application, therefore is neutral to desktop and data base legacy applications.
- ✓ Prepare a document for signing, print a report, fill out a form, and send it for eSignature enabling, email link distribution and signing, and or face to face
- ✓ Small file sizes, ideal for mobile.
- ✓ Scalable from desktop to large enterprise, and customisable.
- ✓ Drag and drop and fixed signature placeholder options.

**“Benefits”**

- ✓ eSignature enable your existing office templates quickly and inexpensively, as you use them.
- ✓ Access your regular business forms from any location and sign, with any device.
- ✓ Save on paper document delivery, storage and courier costs.
- ✓ Save on document retrieval costs and can retrieve from anywhere.

Microsoft Partner

Documents can be signed at the counter, on a tablet anywhere on the premises, and or emailed for signing for both personnel and customers.

Note the Black Box is "external" to existing legacy and desktop applications, it's a "neutral add on".

After documents are fully signed they are returned to the server for storage and distribution.

Electronic copies can be emailed to signors.

Any document can be filled out then prepared for signing, from office documents, contracts, check in, accounts, bar and restaurant purchases, bank account opening forms, medical admittance, passports, id cards.

Legacy Data Base Applications and desktop applications.
