

MiSign Chameleon Suite 2020

“Create and upload a document, send email alerts to Signors, internal or external, they can sign wherever they are, with whatever signing device they have at the time, and with whatever Signature Type is Appropriate”

“Business Type, Browser, Device Agnostic”

“SDK/API and Out of the Box”

- Deploy faster and cheaper with less ongoing maintenance and support.
- Highly secure device capture control with full biometric and digital evidence.
- Deploy on premise or use our cloud service.
- The captured signature data is bound inside the document.
- Some versions have badging options.
- You do not have to change your existing legacy data base applications or desktop applications. Simply upload a PDF with the fixed place signature place holder tags and MiSign will do the rest.
- Multiple pricing models, per inhouse user, per document, per signature

“Sign Now Sign Later”

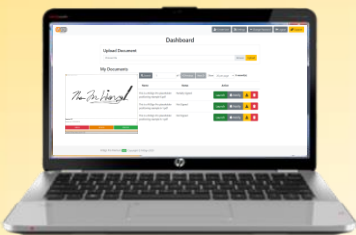

“Emulating existing paper and INK Processes digitally and legally, fast track migration to digital transformation”

“Biometric Data is captured when using dynamic handwritten signatures”

“Mix Signature Types and Signing Devices on the same document”

“45 Day eval versions available”

“Singapore and Australia”

“Dynamic Personal Dashboard”

Each signor only sees their documents
